

You can use your mobile device to generate the image on the wall.

You will need a mobile device with an Internet connection and the free app *Aurasma* installed to interact with the wall.

### **Step 1: Download and setup Aurasma (one time setup)**

1. Search for and download the “Aurasma” app in Google Play or the Apple App Store
2. Launch the app and when prompted to use your current location, select “OK”
3. Select the “A” symbol 
4. Select the magnifying glass icon 
5. In the search box, type in “Ispunjeno ispraznjeno” (or only "Ispunjeno") and select “Search”
6. Select “Ispunjeno ispraznjeno” channel and then select “Follow”.

### **Step 2: Activate the image on the 11 locations in Zagreb**

1. Ensure your device is connected to the Internet and your sound is turned up
2. Load the Aurasma app in camera mode by selecting the target icon 
3. Hold your mobile device up to see QR Code
4. Wait until a purple swirl appears and activates the symbol. You'll see the detail of the image. It may be lost quick if you got lost QR code from the view, but don't worry:
5. Made few steps back, and hold your mobile device up again to see whole picture.

### **Tips**

- If the image is not activating, try slowly moving the device forward and back until the purple swirl appears
- If there are any major obstructions in your camera view, the image may not activate
